

Health and Safety Issues

The bedroom windows to the front of the house can be locked.

This is to prevent visitors falling/jumping out as this may cause injury!!

If you wish to have a bedroom window open or locked the key is with the key to the back door. Unlocking these windows is entirely at your own risk.

The torch plugged into the socket at the top of the stairs is switched on and will illuminate if there is a power failure and/or movement. Please do NOT remove except in case of an emergency.

Do not climb on the walls and fences. They are there to keep livestock out of the gardens and parking areas.

Please keep gates closed and secure – follow the Country code.

PLEASE FOLLOW THE HMG GUIDELINES IN RELATION TO COVID-19
